Bradley,

Can you announce the following for the next City/County Meeting?

Local Mitigation Strategy Meeting - April 19, 10:00 – 11:30, Emergency Operations Center

City LMS representatives should come. We will have a presentation from a Mitigation Specialist from the Florida Division of Emergency Management.

Debris Management Course - May 2-3 - Orlando

FDEM is providing a two-day course. Encourage city debris coordinators to attend if none have previously or have before 2004. Lots of changes since then. More information and sign up at <http://trac.floridadisaster.org/trac/EventDetailPublic.aspx?ID=150&mode=ModeEdit&LookupName=eventsearchpublic>

Shelter Analysis Kickoff Meeting - May 9, 1:30- 3:00, Emergency Operations Center

The Florida Division of Emergency Management will be reviewing the structures of hurricane shelters. This is a quasi-engineering process. They offered to look at any of our critical facilities such as fire stations, police stations, emergency centers, etc. If any city is interested, then send a representative to the meeting. This meeting will provide an overview of the process.
